

Abbreviated Curriculum Vitae - Ian M. Ray

Education:

Ph.D. 1989 Plant Breeding and Plant Genetics, University of Wisconsin-Madison.
M.S. 1987 Plant Breeding and Plant Genetics, University of Wisconsin-Madison.
B.S. 1985 Agriculture (Chemistry minor), New Mexico State University-Las Cruces.

Research Positions and Employment:

1989-1993 Research Geneticist, USDA-ARS, Northern Great Plains Res. Lab, Mandan, ND.
1994-2000 Assistant Professor, Dept. of Agronomy & Horticulture, New Mexico State Univ.
2000-2006 Associate Professor, Dept. of Agronomy & Horticulture, New Mexico State Univ.
2006-present Professor, Dept. of Plant & Environmental Sciences, New Mexico State Univ.

Current Research Emphasis: Genetic characterization and improvement of drought tolerance in alfalfa through molecular techniques and conventional breeding approaches.

Current* and Previously Taught Courses (1994-2018):

AGRO 610*	Advanced Plant Breeding	AGRO 365/365L	Principles Crop Production
GENE 315*	Molecular Genetics	AGRO 483	Sustainable Crop Production
GENE 440*	Genetics Seminar	AGRO/BIOL 486	Intermediate Genetics
GENE 486*	Genes and Genomes	GENE 305L	Genetic Tech. Laboratory

Graduate Student Advising (past 5 years):

Harpreet Kaur and Arshdeep Singh Gill: current Ph.D. and M.S. candidates, respectively.
Lovepreet Singh, M.S. degree completed 2017; Gina Babb, Ph.D. degree completed 2014; Nick Santantonio and Chris Pierce, M.S. degrees completed 2013.

Honors and Awards (past 5 years):

2013-present Billy and Louis Melton Endowed Chair in Plant Breeding and Genetics (NMSU)
2015 Donald C. Roush Excellence in Teaching Award (NMSU)
2013 College of ACES Teaching Excellence Award (NMSU)

Funded Projects (past 5 years):

Ray, IM (PI) and L. Yu. (2016-2021) Marker Assisted Breeding in Elite Alfalfa Germplasm to Enhance Biomass Productivity during Drought. Amount: \$381,108. Source: Alforex Seeds.
Putnam, D. (PI) and I.M. Ray. (2014-2017) Subsurface Drip Irrigation, Deficit Irrigation Strategies, and Improved Varieties to Improve Alfalfa Water Use Efficiency under Drought Conditions. Amount: \$108,868. Source: USDA-NIFA.
Ray, I.M. (PI). (2012-2015) DNA Marker Assisted Selection to Improve Alfalfa Production in Drought-Prone Environments. Amount: \$50,000. Source: Cal-West Seeds.

Selected Peer-Reviewed Publications From Among 54 Articles: (Graduate students underlined)
